Subject: citation formats for rds and landslides
Attachments: Draft Final Findings Document101414.doc

Hi Alan--

I went ahead and plopped the roads and landslides rationales into the decision doc. When I skimmed, I noticed a few of the citations aren't formatted to match the others. Can you take a look at the ones highlighted in pink and fix?

Format should be as follows:

Aurthor(s) (or agency if no specific author listed). Year. Title. Journal article (if applicable) or other distinguishing info for the citation.

Take a look at how the others are done if you have questions.

Thanks,
Allison

Allison,

I addressed the two remaining comments on the roads rationale. I think it reads fine but it is not as good as the others. As we've discussed, it has been a challenge making this rationale "flow". I suggest we go with it and see what others think. New eyes may help us on this. I will review it again but want to get to Steve's, Christine's, Erik's and Jayne's comments on Riparian. Should I send this out to the "Roads" members? Let me know if you have any questions.

Alan
